The project **KM0** by **ESTER PEGUEROLES** put together emphasise the significance of the communication, either from a written text about the memory of a place. Time, memory, story, place, word, together in a context of the lack of freedom, in which the work has been conceived, are the main purpose of the artist'work.

The School of the Penitentiary Centre of Albocasser is the starting point where the artist collects stories from the interns about a memory of a place or maybe the memory of a place related to the feelings brought back to them. The images from Km 0 by artist Ester Pegueroles arise from the intervention between the written story and the memory of another experience, whose journey to the actual place of the image is not feasible. The pictures do not aim to give an image to the story, as they are a new experience, the testimony of a journey, in a geographical sense and with a meaning and identity too, referring to the impossibility of the trip beyond the personal imaginary.

**ESTER PEGUEROLES**, Castelló de la Plana (1970), is a specialist in photography and art.
